CAD tool. It has remained the industry standard through the years despite constant competition from other applications like Microsoft's AutoCAD LT or the free cross-platform open source toolkit SVGDraw. AutoCAD comes with a wide variety of tools for creating 2D and 3D drawings, as well as analysis, documentation, and other

---

professional-oriented features.

AutoCAD is the most popular CAD tool among professionals in various industries and across the globe. More than 20 million users worldwide use AutoCAD each year, generating more than \$4 billion in revenue. AutoCAD has been updated regularly over the years to improve upon previous

---

functionality. Most recently, in 2017, a new platform was introduced that is tailored for mobile use. In 2018, a web-based version was also released, offering additional mobile functionality. AutoCAD 2019 was released in May of 2019. Etymology AutoCAD is a combination of "automated" and "CAD". The

For everyone." History As the market for CAD software continued to grow and diversify, Autodesk responded by creating AutoCAD in 1982, the first CAD tool to run on microcomputers.

The AutoCAD product is recognized as a landmark in the history of the graphics and CAD industry, with several milestones

---

including the development of the first commercial, turnkey production CAD system and the release of the first 3D modeling application. The growth of the AutoCAD product has been attributed to multiple factors including the emergence of the personal computer as a desktop computing platform. Autodesk

acquires KeyCAD and releases AutoCAD first software version in 1982 In September 1982, Autodesk released AutoCAD as a product for the Macintosh personal computer platform. By October 1982, the software was available for the IBM PC and the first version was released in 1982. In 1983, Autodesk introduced the

products, as well as distribution agreements in certain countries. The list of sponsors has changed over time. The company was acquired by Autodesk in 2005 for \$6.2 billion, which represented about 4.5 percent of Autodesk's 2010 revenues.
